*Living With Intention* Audio Program  
By Deanna Davis, PhD

There's an art and a science to living deliberately. *Living With Intention* comes from exploring your priorities and passions and capitalizing on your skills and gifts. Yet busy lives and competing commitments can make it tough to spend time and energy to reflect on what's really important to you and what you want to do next.

*Living With Intention* offers a proven solution to help you make purposeful life choices and find meaning in all you do. Using a unique combination of information, inspiration, and reflection, this audio program will guide you in creating a vision for who you want to be and how you want to design your life.

**Volume One** shares three critical foundations for designing a wildly fulfilling and remarkably successful life:

**Disk One**, *Powerful Perspectives*, focuses on creating an attitude of possibility and opportunity using simple ways to reframe your thinking and your life.

**Disk Two**, *Get Vivid, Get Busy, and Get Support*, details the best strategies for building a vision and complementary goals that ensure your fulfillment and success.

**Disk Three**, *Energy, Focus, Outcomes*, highlights practical ways to direct your time, energy, and expertise to achieve outstanding results.

**Disk Four**, *Worksheets and Reminders*, offers a host of great resources for putting your new-found knowledge into action.

**Volume Two** continues with three additional fundamentals for creating a life of meaning and purpose:

**Disk One**, *What You Do Best*, covers proven approaches for identifying your unique strengths and gifts, along with the best ways to use them to create the life you want.

**Disk Two**, *Enduring Happiness*, shares the most researched techniques for weaving more joy and contentment into your days and your life.

**Disk Three**, *From Stress to Success*, explores how to tap into the power of positive stress while minimizing the impact of negative stress through research-based practices.

**Disk Four**, *Worksheets and Reminders*, provides another set of outstanding resources for translating ideas into results.
