LIVING WITH INTENTION

*An Audio Program and Book
By Deanna Davis, PhD*

There's an art and a science to living deliberately. ***Living With Intention*** comes from exploring your priorities and passions and capitalizing on your skills and gifts. Yet busy lives and competing commitments can make it tough to spend time and energy to reflect on what's really important to you and what you want to do next.

Living With Intention offers a proven solution to help you make purposeful life choices and find meaning in all you do. Using a unique combination of information, inspiration, and reflection, this audio program will guide you in creating a vision for who you want to be and how you want to design your life.

Volume One shares three critical foundations for designing a wildly fulfilling and remarkably successful life:

Disk One, Powerful Perspectives, focuses on creating an attitude of possibility and opportunity using simple ways to reframe your thinking and your life.

Disk Two, Get Vivid, Get Busy, and Get Support, details the best strategies for building a vision and complementary goals that ensure your fulfillment and success.

Disk Three, Energy, Focus, Outcomes, highlights practical ways for directing your time, energy, and expertise to achieve outstanding results in everything you do.

Disk Four, Worksheets and Reminders, offers a host of great resources for putting your new-found knowledge into action.

Volume Two presents three additional fundamentals for creating a life of meaning and purpose:

Disk One, Enduring Happiness, introduces the science of life satisfaction and the top techniques for weaving more joy and contentment into your days and your life.

Disk Two, What You Do Best, covers proven approaches for identifying your unique strengths and gifts, along with the best ways to use them to create the life you want.

Disk Three, Balance and Resilience, explores how to tap into the power of positive stress while minimizing the impact of negative stress in simple but powerful ways.

Disk Four, Worksheets and Reminders, provides another set of resources for helping you translate ideas and information into results.
